Business Activities

>20 years of professional
experience and passion
for natural graphite

ProGraphite GmbH offers professional expertise and services in natural graphite and other carbon products. ProGraphite is able to support you in a very wide range of matters concerning graphite and graphite products. Professional guidance leads to cost effective results for our customers.

Our knowledge is your advantage

Consulting

- Competent expert assistance in graphite projects from prospection to regular production
- Independent evaluation of graphite projects and producing companies for investors, banks etc.
- Planning input for production lines, e.g. flotation plants or spherical graphite plants for Li-Ion-Batteries
- Creation of sustainable growth and development strategies for graphite projects and companies
- R&D on Graphite innovations
- Market analysis of natural graphite and other raw materials used in LIB and high-tech products (e.g. Li, Co, Ni, W)
- Pricing models for natural graphite
- Special experience in graphite use for Lithium-Ion-Batteries (LIB)

Geology and Mineralogy

- Geological desktop studies and data search, data compilation and review, scoping studies for graphite and other raw materials
- Geological mapping and sampling, field work
- Petrographic and geochemical analysis of ore, host rocks, concentrates and tailings
- Additional mineralogical analyses (SEM, MLA, XRD etc.) via external labs but competent evaluation of data and results included
- Technical reporting

Lab Services

- Performance of in-house testwork for a wide range of metallurgical processing
- Complete range of graphite and carbons analysis options
- Comprehensive evaluation of graphite ores and graphite grades
- Development of possible applications in the industrial space
- Sample preparation service:
We transform your material into samples according to customer requirements
- Guidance, execution and supervision of advanced tests in external labs or pilot plants, e.g. for LIB-graphite: from spheronization to battery performance tests

Trade

- Trade with different carbon/graphite products
- Product portfolio: Natural graphite (flakes, vein and amorphous), synthetic graphite and other carbon products; specialities like expandable graphite, spherical graphite etc.
- Own lab for quality assurance
- Development of tailor-made grades in close cooperation with customers and suppliers

ProGraphite Shop

- ProGraphite's online shop offers a wide variety of different kinds and specifications of graphite and graphite products
- The portfolio ranges from standard grades to advanced products like spherical or expandable graphite in different grades
- Specialities like giant flakes and graphite ores are also offered
- Quality control ensured through own laboratory
